### **DETAILED ACTION**

1. This office action is in response to the application filed 26 November 2003, in which claims 1-11 were presented for examination.

#### ***Allowable Subject Matter***

2. Claims **1-11** are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the claimed method, device, program product on a computer-readable medium which causes a computer system to execute a process comprising, among other things: measuring a position of a transmitter by processing a transmitter signal received by a plurality of receivers, the transmitter being attached at a predetermined point of a vehicle; calculating displacement of the transmitter by comparing the measured position with a reference position of the transmitter, the reference position being a position at which the transmitter is supposed to be when the vehicle is in normal state; and identifying damaged parts around the transmitter, based on the displacement of the transmitter.

The prior art teaches a diagnostic and repair estimation system using an external means of determining damage to the vehicle, such as cameras, lasers or radar, to determine the displacement of certain points on a damaged motor vehicle from their proper location. However, none of the prior art of record either singularly or in combination teaches the claimed method and system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
